Non marring, non sparking USA brass punches and scrapers now offered in an improved smooth polished finish with a double knurled feature for more effective use. Whether the job requires a limited or the widest range of brass tools, Mayhew is the only professional solution to provide the requisite number of tools, within spec and with packaging that withstands typical harsh workplace environments.

Designed to remove gaskets and softer material where there is a concern of damaging the surface or causing sparks.

Hard Cap Safety Chisels are designed using safety enhanced impact technology, SEIT. This technology utilizes the latest polymer science developed by Dupont to reduce bio-mechanical hazards to the user. Polymer caps will not break or deform and significantly reduces transmission of shock and vibration while protecting the fingers and hand from glancing blows and miss hits. Hard Caps provide a greatly enlarged target and reduce the injurious noise of metal-on-metal impact. research and testing has shown that hard cap safety chisels produce a significantly safer, more comfortable struck tool that eliminates mushrooming and flying metal fragments. Cushion grip provides greater comfort while reducing shock, moderates heat and cold and is oil and grease resistant. Tools are hand forged and individually heat-treated from premium grade American alloy steel

- This panel repair system works without heat quickly reducing the surface of the dented area by as much as 80-90%
- Proprietary pads made from vulcanized rubber reinforced with kevlar
- Oil resistant
- Will remain functional even if punctured
- Auto Industry Approved
- Pads inflate to different thickness and pressures
- Quickly and easily 'pop out' sizeable dents before final body work

- Ideal for aluminum panels & body repairs
- Versatile design provides proper hammer weights & shaping heads for any job
- Polyamide coated high density cast metal dollies for increased impact stability
- Automotive Industry Approved
